

Single-Chamber-Vacuum-Splints

- pressure-free and pain minimising suction process
- Variable positioned Velcro strips (problem-free replacement if lost)
- Opening in heel area
- Full arm splint can also be used as lower leg splint
- X-ray penetrable, and MRT and CT compatible
- Compared to the use of pneumatic splints, the immobilisation is pressure-free and therefore avoids pain for the patient
- Available as a set (bag including: lower arm, full arm, leg splint, repair kit, suction pump)
